

**AMENDMENTS TO THE CLAIMS**

Claim 1 (Cancelled)

2. (Currently Amended) A coin dispensing apparatus, comprising:  
an inserting aperture, provided at an upper part of a main body, for receiving coins to be inserted thereinto;  
a first sorting unit comprising a coin discriminating device for discriminating genuineness of coins inserted into said inserting aperture, said sorting unit sorting said coins discriminated in said coin discriminating device;  
a holding unit for temporally holding said coins sorted in said first sorting unit;  
a coin storing unit provided under said holding unit; and  
a coin repayment unit, provided at a lower part of said main body, for returning said coins to a customer;  
wherein said coin dispensing apparatus has  
a holding cylinder provided in said holding unit for temporally holding said coins,  
a wiper provided at a lower part of said ~~housing~~ holding cylinder for sweeping said coins, and  
a second sorting unit provided under said wiper for sorting said coins to said coin storing unit or said coin repayment unit.

3. (Previously Presented) A coin dispensing apparatus, as defined in claim 2, wherein:  
said coin dispensing apparatus has a coin storing passage connected with said coin storing  
unit and a repayment passage connected with said coin repayment unit, and a damper provided in  
said second sorting unit for switching said coin storing passage and said repayment passage.

4. (Previously Presented) A coin dispensing apparatus, as defined in claim 2, wherein:  
said coins include coins more than one kind.

5. (Currently Amended) A coin dispensing apparatus, comprising:  
an inserting aperture, provided at an upper part of a main body, for receiving coins to be  
inserted thereinto;  
a sorting unit comprising a coin discriminating device for discriminating genuineness of  
coins inserted into said inserting aperture, said sorting unit sorting said coins discriminated in  
said coin discriminating device;  
a holding unit for temporally holding said coins sorted in said sorting unit;  
a coin storing unit provided under said holding unit; and  
a coin repayment unit, provided at a lower part of said main body, for returning said  
coins;

wherein said coin dispensing apparatus has

a holding cylinder provided in said holding unit for temporally holding said coins,  
a wiper provided at a lower part of said holding cylinder for sweeping  
said coins, and

a receiving member provided near said wiper for sorting said coins to said coin storing unit or said coin repayment unit by operation with or without being linked to said wiper.

6. (Original) A coin dispensing apparatus, as defined in claim 5, wherein: operation of said receipt member is linked with said wiper in storing coins in said coin storing unit, and is not linked with said wiper in sweeping coins to said coin repayment unit.

7. (Previously Presented) A coin dispensing apparatus, as defined in claim 5, wherein: said coins include coins more than one kind.

Claim 8 (Cancelled)

9. (Previously Presented) A coin dispensing apparatus, as defined in claim 2, wherein during a selling operation, the coins in said holding unit are transferred to said coin storing unit, and  
during a returning operation, a passage from said holding unit to said coin storing unit is blocked and the coins in said holding unit are transferred to said coin repayment unit via a repayment passage between said holding unit and said coin repayment unit.

10. (Previously Presented) A coin dispensing apparatus, as defined in claim 5, wherein during a selling operation, the coins in said holding unit are transferred to said coin storing unit, and

during a returning operation, a passage from said holding unit to said coin storing unit is blocked and the coins in said holding unit are transferred to said coin repayment unit via a repayment passage between said holding unit and said coin repayment unit.
